

### The main technical parameters

#### Basic Information

Model NO.	CDS2S	Coil Frequency	50Hz
Certification Requirements	CCC,CE	Need to Meet The Standards	GB/T 14048.4 IEC 60947-4-1
Transport Package	Customizable	Specification	230*100
Trademark	DELIXI ELECTRIC	Origin	China

#### Product description

product model	current shell frame	Control mode	setting current
CDS2s	13	B	P16
	13:13A 32:32A 65:65A 95:95A	B: with buttons None: without buttons	P16:0.16A ... 95:85-93A

Note: p stands for decimal point

### Technical Parameters

Shell frame	CDS2s-13			CDS2s-32		CDS2s-65			CDS2s-95								
Rated operating current (le) AC-3	9A	12A	18A	25A	32A	40A	50A	65A	80A	95A							
Maximum power of controllable motor (AC-3, 380V)	4kW	5.5kW	7.5kW	11kW	15kW	18.5kW	22kW	30kW	37kW	45kW							
Mechanical life (10,000 times)	1200			1000		900			650								
Electrical life (10,000 times)	110			90			65										
Operating frequency AC-3 (times/hour)	1200			600													
Rated insulation voltage (Ui)	690V																
Rated working voltage (Ue)	220V, 380V, 660V																
Allow control loops Run (V)	85% ~ 110% Us																
Voltage (Us) Realse (V)	20% ~ 75% Us																
Rated voltage of operating coil (Uc)	36V, 110V, 220V, 380V																
Coil frequency	50Hz																
Operation type:	With button, without button																
Certification requirements	CCC, CE																
Need to meet standards	GB/T 14048.4 IEC 60947-4-1																
Environmental requirements	Maximum working altitude	2000m															
	Ambient air temperature	-5°C ~ +40°C															
	Installation location	The inclination to the vertical plane does not exceed ±22.5°															
	Rated impulse withstand voltage	6kV															
	Humidity requirements	When the atmospheric conditions are +40°C, the relative humidity of the atmosphere does not exceed 50%. It can have higher relative humidity at lower temperatures. The monthly average of the wettest month is the lowest. The temperature does not exceed +25°C, and the monthly average maximum relative humidity in that month does not exceed 90%, and condensation on the product due to temperature changes is taken into consideration.															
	Installation conditions	a. In a medium with no explosion hazard, and in a place where there are no gases or conductive dust that can corrode metal and destroy insulation. b. In places with rain and snow protection equipment and not filled with water vapor c. In a place without significant shaking, impact and vibration
